4. In view of the above, it is my recommendation that a waiver to regulation be secured from the Deputy Director (Support) to permit retaining in a per diem status extending beyond the 180 days to encompass the period beginning at 1200 on 22 January 1956 and continuing to date and time of departure from the vicinity of Los Angeles, 0830, 15 March 1956 at the reduced rate of (\$8.00) per diem provided for in the regulation cited. Roughly this calculates to additional per diem of \$424.00 above the amount covered and paid under existing regulations for the preceding 130 days.

STAT STAT

- 6. The communications officer in reference (c) above, particularly paragraph number 2, recommends that the per diem claimed for the period of duty in the Washington, D. C. area be denied and there appears to be no reason for questioning this recommendation. For your information this employee was in Washington, D. C. at the time of selection for project business and based on all information available in his project personnel file any recommendation for per diem while in Washington would be a questionable item.
- 7. If you concur in the above as well as the recommendation made by the communications officer, please furnish the vaiver and approval indicated in order that this long-outstanding disbursement may be effected.
